JAYLORD M. MIRANDA

SOC Analyst Level 2 | Visibility Engineer | Cybersecurity & WAF Operations | Architecture Design & ATRAVA DEFENSE

Bacolod City, Negros Occidental, Philippines
0995-537-5073 | mirandajaylordm@gmail.com

PROFESSIONAL SUMMARY

Cybersecurity professional with nearly two years of experience in Security Operations Center (SOC) operations, incident response, infrastructure security, and Web Application Firewall (WAF) operations. Experienced in monitoring, investigating, and managing security alerts across multiple client environments using Stellar Cyber Open XDR, WithSecure Elements, ESET PROTECT, and ESET Inspect.

Hands-on experience handling web application security platforms, including **Sucuri and Reblaze**, with exposure to WAF monitoring, IP address blocking, bot mitigation, suspicious traffic analysis, and web security testing.

Skilled in developing custom security detections, writing incident response playbooks, preparing Methods of Procedure (MOPs), and supporting infrastructure security projects involving Proxmox VE, pfSense, Linux, Zabbix, and site-to-site VPN connectivity.

Holds multiple cybersecurity certifications and technical training credentials from 2024–2026, with a strong commitment to continuous professional development.

CORE COMPETENCIES

1. Security Operations Center (SOC)

- Security Alert Monitoring and Triage
- Security Event Investigation
- Incident Response and Escalation
- Phishing and Business Email Compromise (BEC) Handling
- Detection Engineering and Custom Alert Development
- SOC Reporting and Documentation

2. Web Application Security and WAF

- Sucuri Web Application Firewall (WAF)
- Reblaze Web Application Firewall
- IP Address Blocking and Access Control
- Bot Detection and Mitigation
- ASN and Geolocation-Based Traffic Analysis
- Web Traffic Monitoring and Security Event Analysis
- WAF Testing and Configuration Validation

3. Endpoint Security and Protection

- WithSecure Elements EPP
- WithSecure Elements Exposure Management
- WithSecure Cloud Security Posture Management (CSPM)
- ESET PROTECT
- ESET Inspect

4. Network and Infrastructure Security

- pfSense Firewall
- Proxmox VE Administration
- Virtual Machine Backup and Migration
- Linux Security
- Zabbix Monitoring
- Site-to-Site IPsec VPN
- OSPF Routing and Dual-ISP Failover
- SRAP Deployment

5. Threat Intelligence and Governance

- Cyber Threat Intelligence (CTI)
- Governance, Risk, and Compliance (GRC)
- Vulnerability and Exposure Management

6. Technical Documentation

- Methods of Procedure (MOPs)
- Incident Response Playbooks
- Network Architecture Diagrams
- Technical Documentation and Reporting

PROFESSIONAL EXPERIENCE

SOC Analyst Level 3 & Visibility Engineer
Cyber Defense Operations Center (CDOC)
Angel T. Redoble & Associates CISO as a Service (ATRACaaS) x The North-Star Cyber Management Inc.
February 2025 – Present

Security Operations and Incident Response

- Monitor, investigate, triage, and manage security alerts across managed client environments as part of the Cyber Security Incident Response Team (CSIRT).
- Perform security event analysis, incident validation, and escalation using Stellar Cyber Open XDR.
- Develop and implement custom SOC detection alerts in Stellar Cyber, including documenting configurations and operational procedures through formal MOPs.
- Support security monitoring, detection, and incident response activities across multiple client environments.

Web Application Security and WAF Operations

- Handle and monitor web application security activities using Sucuri and Reblaze Web Application Firewall platforms.
- Perform IP address blocking and access control to mitigate suspicious and potentially malicious web traffic.
- Analyze web traffic patterns, bot activities, and suspicious requests to support threat detection and mitigation.
- Utilize Reblaze security capabilities to assess traffic based on ASN, geolocation, and other security indicators.
- Conduct WAF testing and configuration validation to assess web application protection and security controls.
- Support investigation and troubleshooting of web security issues, including access restrictions and traffic filtering.

Security Documentation and Incident Management

- Authored a Phishing and Business Email Compromise (BEC) Incident Response Playbook, covering incident validation, escalation, reporting, and approval procedures.
- Develop Methods of Procedure (MOPs) for infrastructure operations and security-related activities.
- Prepare technical documentation and operational reports to support consistent security operations.

Infrastructure and Network Security

- Developed technical MOPs for Proxmox VE backup strategies, Zabbix recovery following MariaDB service failures, and KVM-to-Proxmox virtual machine migration.
- Designed site-to-site IPsec VPN connectivity with dual ISP failover and OSPF routing.
- Created network architecture and infrastructure diagrams for client environments.
- Conducted technical testing of WithSecure Elements Endpoint Protection for Linux servers.

- Configured restricted Proxmox VE permissions to support controlled user access and administrative responsibilities.
- Supported SRAP deployment and infrastructure security activities involving pfSense firewalls and Stellar Cyber.

EDUCATION

Bachelor of Science in Computer Engineering (BSCpE)
Carlos Hilado Memorial State University
Graduated: 2025

CERTIFICATIONS AND TECHNICAL TRAINING

2026 – WithSecure

- XM Daily Admin 1 – Users (EVM) | July 12, 2026
- WithSecure Linux Security 64 Technical Training (Basic) | July 12, 2026
- XM Tech Advanced 2 – Vulnerabilities, Elements Exposure Management for Business (Advanced) | June 22, 2026
- XM Daily Admin 2 – Cloud (CSPM) | June 22, 2026
- XM Tech Basic – Elements Exposure Management Technical Training (Basic) | June 22, 2026
- WithSecure Troubleshooting & Supporting End Customers | June 18, 2026
- WithSecure Managed Service Provider (MSP) Sales Training | June 18, 2026
- ESC – WithSecure Elements Portal | June 18, 2026

2025

- 3-Day Cyber Threat Intelligence (CTI) Training – Resecurity, Inc.
- ESET PROTECT and ESET Inspect Technical Training (CCSPP Batch 3) – January 21–24, 2025
    - B1G2 Technologies International Inc. with PICSPro

2024

- Governance, Risk Management, and Compliance Essentials (CCSPP) – December 10–11, 2024
    - PICSPro / ATRACaaS

PROFESSIONAL MEMBERSHIPS AND EVENTS

- Philippine Institute of Cyber Security Professionals (PICSPro) – Active Member since November 21, 2024.
- PICSPro Membership Number: 3026-2024.
- Kwentuhang Cybersecurity: Social Media & National Security – Balancing Privacy and Digital Freedom, PICSPro Bacolod Chapter | January 24, 2025.
- Marketing ME Live Career Session, Jobs180.com, Carlos Hilado Memorial State University – Alijis Campus | May 27, 2025.
